

**Responsible Conduct of Scientific Research
BMS 670/EHS 675
Course Syllabus
Spring 2010**

Wednesdays, 3:30-4:30 p.m.

Center for Medical Science 1st Floor Conference Room

INSTRUCTORS

Robert Jansing, Ph.D.
Assistant Professor
Department of Environmental Health Sciences
Contact information: ESP D622
(518) 473-0321
jansing@wadsworth.org

Randall Morse, Ph.D.
Professor
Department of Biomedical Sciences
Contact information: CMS 5217
518 486-3116
morse@wadsworth.org

OFFICE HOURS:

By Appointment.

COURSE DESCRIPTION:

The course is designed to meeting current federal regulations, which require that all institutions receiving NIH training grants provide training in the responsible conduct of research. The purpose of this course is to engage students in reading, considering, and discussing the responsible conduct of scientific research.

COURSE PREREQUISITES:

None

COURSE FORMAT:

Course topics will be covered by a combination of one or more of the following elements: lectures, assigned readings in the course text ("Introduction to the Responsible Conduct of Research"), additional recommended readings provided by the instructors, assigned case studies, and discussion in class. The course will be structured around weekly 1hour seminar sessions. The first half of the session will be devoted to a discussion of the assigned readings and the ethical issues which they raise. The second half of the session will be devoted to discussing and applying those issues to the assigned case for the session.

COURSE REQUIREMENTS:

Attendance and participation in classroom discussion is mandatory and will provide the basis for credit. Grades are assigned on a "Satisfactory/Unsatisfactory" basis.

To receive credit for the course, each student will be expected to:

- 1) Lead at least one classroom discussion; and
- 2) Actively participate in all classroom discussions.

Although students are expected to attend all classes, we understand that emergencies can sometimes arise. Students who miss a class will be asked to write a short paper outlining a controversy or discussing an issue relevant to the responsible conduct of scientific research. The topic of the paper will be assigned by one of the course instructors. The length of the paper will increase exponentially for each class missed, for the first missed class, students will write a 2-page paper; for the second class, a 4-page paper; for the third class, an 8-page paper, etc. Students who fail to read the assigned materials and who attend class unprepared to fully participate also will be required to write a paper.

ONLINE TEXT: ORI Introduction to Responsible Conduct of Research
Nicholas H. Steneck, Revised 2007

<http://www.ori.hhs.gov/documents/rcrintro.pdf>

Additional readings will be assigned by the instructors. All students are expected to review the assigned reading and cases prior to class. Students also are encouraged to independently research and review other cases and papers related to the weekly discussion topics.

TENTATIVE SCHEDULE:

NOTE: The course schedule or organization may be changed as necessary to better achieve the course objectives.

1/20	Introduction to Course; Ethics and Decision Making	RCR Course Objectives	
	Topics	Steneck Readings	Student Leader
1/27	Research Misconduct	pp 1-29	
2/3	Data Management Practices	pp 86-101	
2/10	Mentoring and Trainee Responsibilities	pp 102-115	
2/17	Collaborative Research	pp 116-127	
2/24	Authorship/Publication	pp 133-154	
3/3	Plagiarism	Assigned Readings	
3/10	Peer Review	pp 146-156	
3/17	Conflicts of Interest	pp 66-81	
3/24	The Welfare of Laboratory Animals	pp 50-65	
4/7	The Protection of Human Subjects I	pp 32-49	
4/14	The Protection of Human Subjects II	pp 32--49	
4/21	Cross-Cultural Research	Assigned Readings	
4/28	Genetic Testing and Research	Assigned Readings	

ADDITIONAL READINGS:

1/20 Introduction to Course; Ethics and Decision-making

- What is ethics?
- Ethics and Morality
- Value of Ethics
- Ethical Relativism
- SUNY Albany Academic Honesty Guidelines

1/27 Research Misconduct

- Fixing Fraud
- BioTech Fraud
- NYSDOH APPM 633.4
- Misconduct Case 1
- Misconduct Case 2

2/3 Data Management Practices

- David Baltimore/Imanishi-Kari Case
- Patents_Technology Transfer
- Patents_Students
- Jessica Banks Case Study

2/10 Mentoring and Trainee Responsibilities

- Lelieveldt H. (2004) What (Not) to Expect From Your Supervisor
- Yaner_Graduate Student Mentoring
- Bob Bailey Case Study

2/17 Collaborative Research

- Wadsworth Center Materials Transfer Agreement Form
- Wadsworth Center Sample Collaboration Agreement Form
- Benowitz S. (2002) When Scientists Don't Share: Is Secrecy a Necessary Evil?

2/24 Authorship and Publication

- Nature Cell Biology: Reproducing Data
- Ghost Writers
- Charlie West Case Study
- Diane Archer Case Study
- Discovery of Pulsars

3/3 Plagiarism

- www.plagiarism.org
- [Avoiding Plagiarism, Self-Plagiarism, and Other Questionable Writing](#)
- [Practices: A Guide to Ethical Writing - St. John's University](#)

3/10 Peer Review

- Chemical and Engineering News Article on Peer Review 2/11/08
- Stem Cell Paper Retraction
- Students asked to review manuscript

3/17 Conflicts of Interest

- COI Reading 1
- COI Reading 2
- Jesse Gelsinger Case
- Levinsky NG. (2002) Nonfinancial Conflicts of Interest in Research
- Vioxx Studies

3/24 The Welfare of Laboratory Animals

1. Moral Status of Animals- British Broadcasting Corporation
- HUSU Statement on Animals in Biomedical Research
 - The Lifeboat Test-McCrone
 - Jenny Ito Case Study

4/7 The Protection of Human Subjects I

- McGuire Dunn 1 & 2
- Belmont Report
- Declaration of Helsinki Revisions
- Dead Son's Sperm Case

4/14 The Protection of Human Subjects II

- Informed Consent Document
- Report_FDA
- Paul Gelsinger
- EthicalNeuroscientist
- NASA Bioethicist

4/21 Cross-Cultural Research

- Wendler D, Emanuel EJ, and RK Lie. (2004)
- Trovan and Meningitis case study
- Ellen- Maternal viral transmission study case study
- Nuffield Council Report

4/28 Genetic Testing and Research

- Arthur Caplan- "Peter Pan" Treatment 2007
- Arthur Caplan- Rebates for human eggs 2007
- Meslin EM, and KA Quaid. (2004) Ethical Issues in the Collection, Storage, and Research Use of Human Biological Materials
- New York State Civil Rights Law 79, Appendix L
- Property Rights_Genetic Material
