

Chlamydia and GC Direct Detection – April 2008 – Postponed indefinitely

***Neisseria gonorrhoeae* culture  
April 2008  
Number of participating labs – 6  
Number of labs scoring 100% - 6**

<b><i>Neisseria gonorrhoeae</i> culture April 2008</b>			
Sample	Result	Method	#labs
NG 08-2A	Negative	bioMerieux API NH	1
		Boule Diagnostics Phadebact Monoclonal GC	1
		Remel BactiCard Neisseria	1
		Remel RapID NH	1
		Thayer Martin Chocolate Agar	1
	Presumptive positive	Presumptive ID on culture with gram stain	1
NG 08-2B	Positive	bioMerieux API NH	1
		Boule Diagnostics Phadebact Monoclonal GC	1
		Remel BactiCard Neisseria	1
		Remel RapID NH	1
		Thayer Martin Chocolate Agar	1
		Presumptive ID on culture with gram stain	1
NG 08-2C	Negative	bioMerieux API NH	1
		Boule Diagnostics Phadebact Monoclonal GC	1
		Remel BactiCard Neisseria	1
		Remel RapID NH	1
		Thayer Martin Chocolate Agar	1
		Presumptive ID on culture with gram stain	1
NG 08-2D	Negative	bioMerieux API NH	1
		Boule Diagnostics Phadebact Monoclonal GC	1
		Remel BactiCard Neisseria	1
		Remel RapID NH	1
		Thayer Martin Chocolate Agar	1
	Presumptive positive	Presumptive ID on culture with gram stain	1
NG 08-2E	Negative	bioMerieux API NH	1
		Boule Diagnostics Phadebact Monoclonal GC	1
		Remel BactiCard Neisseria	1
		Remel RapID NH	1
		Thayer Martin Chocolate Agar	1
	Presumptive positive	Presumptive ID on culture with gram stain	1
