APPLICATION for PRIMARY ACCREDITATION - AIR AND EMISSIONS

Laboratory Name: 
Address: 
City, State, Zip: 

If New York ELAP is your laboratory's primary NELAC accreditor, you must include the following for each analyte for which approval is requested:
- Demonstration of Capability (DOC) form,
- DOC summary/supporting data, and
- Standard Operating Procedure

To complete this form, please place an “A” on the line preceding each analyte name to indicate an addition to your scope of accreditation. If you wish to remove an analyte from your scope, place an “E” on the line preceding each analyte name. Also, please cite the determinant and/or prep method you wish to add or erase by using the "ELAP Method Number" listed in the Certification Manual Item 180.4. For example, cite Fibers by PCM using NIOSH 7400A Rules as "4587".

An application that omits any of this information will be considered incomplete.

Is the application request for additions (“A”) for NYS work (i.e. will analysis be performed on NYS samples)? _Y_ _N_
