

<b>Sample name</b>	<b>Details</b>
FIBERS (for phase contrast microscopy measurement) (non-NELAC)	Four 25 mm 0.8 micron MCE filters containing a variety of asbestos and non-asbestos fibers in various lengths
ASBESTOS (for transmission electron microscopy measurement) (non-NELAC)	For TEM. Two 25 mm 0.45 micron MCE filter samples generated from aerosol containing a variety of asbestos and non-asbestos fibers in various lengths. Occasionally a magnification or identification sample is substituted for one of the filter preps.
