New York • Pennsylvania • Virginia • West Virginia

## Diagnostic Guidelines for Confirmation of Screen-Positive Newborn Screening Results

Updated:  
September 2014

**David Kronn**, Westchester Medical Center; **Shideh Mofidi**, Westchester Medical Center; **Nancy Braverman**, McGill University - Montreal Children's Hospital; **Katharine Harris**, Wadsworth Center, NYS Department of Health

2013 Update: **Marzia Pasquali**, ARUP Laboratories; **Nicola Longo**, University of Utah Health Science Center

2014 Update: **Beth Vogel**, NYS Newborn Screening Program

NYMAC Diagnostics Guidelines Work Group: **Darius Adams**, Albany Medical Center; **Georgianne Arnold**, University of Rochester School of Medicine; **Susan Berry**, University of Minnesota; **Susan Brooks**, The University of Medicine and Dentistry of New Jersey; **Frank Desposito**, The University of Medicine and Dentistry of New Jersey; **George Diaz**, Mount Sinai Medical Center; **Can Ficioglu**, Children's Hospital of Philadelphia; **Renata Gallagher**, University of Colorado; **Patricia Galvin-Parton**, Stony Brook Medical Center; **Cheryl Garganta**, Tufts Medical Center; **Sharron Gargosky**, Hyperion Therapeutics; **Micki Gartzke**, Save The Babies Through Screening; **Carol Greene**, University of Maryland Medical Center; **Paul Levy**, Albert Einstein School of Medicine; **Jill Levy-Fisch**, Save The Babies Through Screening; **Uta Lichter Konecki**, Children's National Medical Center; **Elizabeth Lim-Melia**, Westchester Medical Center; **Nicola Longo**, University of Utah Health Science Center; **Madelena Martin**, UMass Memorial Medical Center; **Dietrich Matern**, Mayo Clinic; **Kate McCurdy**, Barth Syndrome Foundation; **Marzia Pasquali**, ARUP Laboratories; **Kenneth Pass**, Wadsworth Center, NYS Department of Health; **Rani Singh**, Emory University School of Medicine; **Valerie Stein**, Westchester Medical Center; **Sharon Suchy**, GeneDx; and **William Wilson**, University of Virginia Health System.

## Table of Contents

Abbreviations .....	68
Acid Sphingomyelinase (ASM) Deficiency .....	60
Adrenal Hyperplasia, Congenital (CAH).....	4
Amino Acidemias .....	9-19
Argininemia (ARG) .....	9
Argininosuccinic Aciduria (ASA) - aka Argininosuccinic Lyase Deficiency.....	10
Argininosuccinic Lyase Deficiency - aka Argininosuccinic Aciduria (ASA).....	10
Beta-Ketothiolase Deficiency (BKT) - aka Beta-Oxothiolase Deficiency .....	44
Beta-Oxothiolase Deficiency - aka Beta-Ketothiolase Deficiency (BKT) .....	44
Biotinidase Deficiency (BIOT).....	53
Carnitine-Acylcarnitine Translocase Deficiency (CACT).....	22
Carnitine Palmitoyl Transferase Type Ia Deficiency (CPT-Ia) .....	20
Carnitine Palmitoyl Transferase Type II Deficiency (CPT-II) .....	21
Carnitine Uptake Defect (CUD) - aka Primary Carnitine Deficiency .....	23
Citrin Deficiency - aka Citrullinemia Type II (CIT-II) .....	12
Citrullinemia Type I (CIT-I).....	11
Citrullinemia Type II (CIT-II) - aka Citrin Deficiency .....	12
Classical Galactosemia (GALT) .....	55
Cobalamin A,B Cofactor (Cbl A/B) .....	36
Cobalamin C Cofactor Deficiency (Cbl C).....	38
Cobalamin D <sub>1</sub> Cofactor Deficiency (Cbl D <sub>1</sub> ).....	36
Cobalamin D <sub>2</sub> Cofactor Deficiency (Cbl D <sub>2</sub> ).....	38
Cobalamin F Cofactor Deficiency (Cbl F).....	38
Cobalamin J Cofactor Deficiency (Cbl J).....	38
Congenital Adrenal Hyperplasia (CAH).....	4
Congenital Hypothyroidism (CH) .....	5
Cystic Fibrosis (CF) .....	54
2,4-Dienoyl-CoA Reductase Deficiency (2,4Di).....	24
Endocrinopathies.....	4-5
Ethylmalonic Encephalopathy (EMA).....	34
Fabry Disease.....	59
Fatty Acid Oxidation Disorders .....	20-33
Galactose Epimerase Deficiency (GALE) .....	57
Galactokinase Deficiency (GALK).....	56
Galactosemia (Classical) (GALT) .....	55
Galactosylceramide Beta-Galactosidase Deficiency .....	63
Gaucher Disease (GD) .....	61
Glucocerebrosidase Deficiency .....	61
Glucosylceramidase Deficiency, not including Saposin C Deficiency .....	61
Glutaric Acidemia Type I (GA-I) .....	45
Glutaric Acidemia Type II (GA-II).....	28
Glycogen Storage Disease Type II (GSD II) .....	62
Hemoglobin S/Beta <sup>0</sup> Thalassemia (HbS <sup>0</sup> ) .....	6
Hemoglobin S/Beta <sup>+</sup> Thalassemia (HbS <sup>+</sup> ) .....	6
Hemoglobin SS (SS).....	6
Hemoglobinopathies .....	6-8
Hemoglobinopathies, Other .....	7
Homocystinuria (HCY) .....	13
Hunter Syndrome .....	65
Hurler Syndrome.....	64
3-@Hydroxyacyl-Co-A Dehydrogenase Deficiency (HADH).....	30
4-Hydroxyphenylpyruvic Acid Oxidase Deficiency .....	19

3-Hydroxy-3-Methylglutaryl-CoA Lyase Deficiency (HMG) .....	46
Hypermethioninemia (MET) .....	14
Hyperphenylalaninemia (H-PHE).....	16
Hypothyroidism, Primary Congenital (CH).....	5
Hypothyroidism, Secondary Congenital .....	5
Isobutyryl-CoA Dehydrogenase Deficiency (IBCD).....	35
Isobutyrylglycinuria (IBG) .....	35
Isovaleric Acidemia (IVA) .....	49
Krabbe Disease .....	63
Long-chain 3-Hydroxyacyl-CoA Dehydrogenase Deficiency (LCHAD) .....	25
Lysosomal Storage Disorders .....	59-66
Malonic Aciduria (MAL).....	50
Maple Syrup Urine Disease (MSUD).....	15
Maroteaux-Lamy Syndrome (MPS VI) .....	66
Medium-chain Acyl-CoA Dehydrogenase Deficiency (MCAD) .....	26
Medium-chain Ketoacyl-CoA Thiolase Deficiency (MCKAT) .....	27
Medium/Short-chain L-3-Hydroxyacyl-CoA Dehydrogenase Deficiency (M/SCHAD).....	30
Methionine Adenosyltransferase Deficiency .....	14
2-Methyl-3-Hydroxybutyryl-CoA Dehydrogenase Deficiency (2M3HBA) .....	52
2-Methylbutyryl Glycinuria (2-MBG).....	51
3-Methylcrotonyl-CoA Carboxylase Deficiency (3-MCC).....	47
3-Methylcrotonylglycinuria .....	47
3-Methylglutaconic Aciduria Type I (3-MGA-I) .....	48
Methylmalonic Acidurias.....	36-39
Methylmalonyl-CoA Mutase Deficiency (MUT) .....	41
Mucopolysaccharidosis Type I (MPS I) .....	64
Mucopolysaccharidosis Type II (MPS II).....	65
Mucopolysaccharidosis Type VI (MPS VI) .....	66
Multiple Acyl-CoA Dehydrogenase Deficiency (MADD).....	28
Multiple Carboxylase Deficiency (MCD) .....	40
Niemann-Pick Syndrome, Types A, B.....	60
Organic Acidemias.....	34-52
Other Genetic Conditions .....	53-58
Other Hemoglobinopathies .....	7
Phenylketonuria (PKU) .....	16
Pompe Disease .....	62
Primary Carnitine Deficiency .....	23
Primary Congenital Hypothyroidism (CH) .....	5
Propionic Acidemia (PA) .....	43
S-Adenosylhomocysteine Hydroxolase (SAH) .....	14
Secondary Congenital Hypothyroidism .....	5
Severe Combined Immune Deficiency (SCID) .....	58
Short-chain Acyl-CoA Dehydrogenase Deficiency (SCAD) .....	29
Sickle Cell Carrier (HbAS).....	8
Sickle Cell Disease .....	6
Sickle C Disease (HbSC).....	6
T-cell-related Lymphocyte Deficiencies.....	50
Thyroxine-Binding Globulin Deficiency .....	5
Trifunctional Protein Deficiency (TFP).....	31
Tyrosinemia Type I (TYR-I) .....	17
Tyrosinemia Type II (TYR-II) .....	18
Tyrosinemia Type III (TYR-III) .....	19
Very Long-chain Acyl-CoA Dehydrogenase Deficiency (VLCAD).....	32
X-Linked Adrenoleukodystrophy (X-ALD).....	67

## Congenital Adrenal Hyperplasia (CAH) (Endocrine Disorder)

<i>Disease (common abbreviation)</i>	Congenital Adrenal Hyperplasia (CAH) (non-classical; salt-wasting; simple virilizing)
<i>MIM #</i>	201910
<i>SNOMED Code / ICD-10-CM Code</i>	237754008; 71578002; 52604008 / E25.0
<i>Enzyme or other abnormality</i>	21-Hydroxylase
<i>MIM # / Enzyme Commission #</i>	201910 / 1.14.99.10
<i>Abnormal Newborn Screening Metabolite(s)</i>	Elevated 17-hydroxyprogesterone (17-OHP)
<i>LOINC Number(s)</i>	38473-5
<i>Initial Diagnostics at Referral Center</i>	Serum 17-OHP Serum electrolytes Blood glucose
<i>Recommended additional testing to consider at time of initial consultation</i>	Clinical suspicion low: None Clinical suspicion high: Steroid profile ACTH stimulation test Mutation analysis
<i>Abnormal Metabolites Expected</i>	Severe: Markedly elevated 17-OHP Decreased sodium, increased potassium, low glucose Mild to moderate: Mild to moderate elevation in 17-OHP Electrolytes and glucose can be normal
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes (only classical 21-hydroxylase deficiency CAH)*
<i>Diagnostic Confirmation</i>	Markedly elevated 17-OHP is diagnostic of severe CAH Mild to moderate 17-OHP elevation do: Steroid profile ACTH stimulation test Mutation analysis
<i>Differential Diagnosis</i>	Stress, prematurity
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0852654%5BDISCU%5D&amp;condition=C0852654&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0852654%5BDISCU%5D&amp;condition=C0852654&amp;compare_labs=1</a>
<i>GeneReviews</i>	<a href="http://www.ncbi.nlm.nih.gov/books/NBK1171/">www.ncbi.nlm.nih.gov/books/NBK1171/</a>
<i>American College of Medical Genetics ACT Sheet</i>	<a href="http://www.acmg.net/StaticContent/ACT/CAH.pdf">www.acmg.net/StaticContent/ACT/CAH.pdf</a>
<i>American College of Medical Genetics Algorithm</i>	<a href="http://www.acmg.net/StaticContent/ACT/Algorithms/Visio-NBS_Elevated_17OHP.pdf">www.acmg.net/StaticContent/ACT/Algorithms/Visio-NBS_Elevated_17OHP.pdf</a>
<i>Recommended Uniform Screening Panel (RUSP)</i>	Core Panel

\* Please note that in some cases, the initial CAH screen may be negative. If this diagnosis is suspected on clinical grounds, please consult pediatric endocrinology. Also be aware that there are several other forms of CAH due to other enzyme deficiencies, as well as congenital forms of adrenal insufficiency, that are not detected by the screen.

**Congenital Hypothyroidism (CH) including Primary Congenital Hypothyroidism, Secondary Congenital Hypothyroidism and Thyroxine-Binding Globulin Deficiency (Endocrine Disorder)**

<i>Disease (common abbreviation)</i>	Primary Congenital Hypothyroidism (CH); Secondary Congenital Hypothyroidism; Thyroxine-Binding Globulin Deficiency
<i>MIM #</i>	Multiple genes or not genetic
<i>SNOMED Codes / ICD-10-CM Codes</i>	190268003; 82598004; 237544006 / E03.1; E03.1; E07.89
<i>Enzyme or other abnormality</i>	N/A
<i>MIM # / Enzyme Commission #</i>	N/A / N/A
<i>Abnormal Newborn Screening Metabolite(s)</i>	Decreased thyroxine (T4)
<i>LOINC Number(s)</i>	31144-9 Elevated thyroid stimulating hormone (TSH) 29575-8
<i>Initial Diagnostics at Referral Center</i>	T4 TSH
<i>Recommended additional testing to consider at time of initial consultation</i>	None
<i>Abnormal Metabolites Expected</i>	Low T4 Elevated TSH
<i>If initial testing is negative has the disorder been ruled out?</i>	Newborns who are ill or premature may experience a late rise in TSH so should be reevaluated **
<i>Diagnostic Confirmation</i>	Repeat TSH, T4 Free T4 T3 resin uptake
<i>Differential Diagnosis</i>	
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0010308%5BDISCU%5D&amp;condition=C0010308&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0010308%5BDISCU%5D&amp;condition=C0010308&amp;compare_labs=1</a>
<i>GeneReviews</i>	None
<i>American College of Medical Genetics ACT Sheet</i>	Elevated TSH: <a href="http://www.acmg.net/StaticContent/ACT/Primary_TSH.pdf">www.acmg.net/StaticContent/ACT/Primary_TSH.pdf</a> Low T4/Elevated TSH: <a href="http://www.acmg.net/StaticContent/ACT/Primary_T4_Followup.pdf">www.acmg.net/StaticContent/ACT/Primary_T4_Followup.pdf</a>
<i>American College of Medical Genetics Algorithm</i>	Elevated TSH: <a href="http://www.acmg.net/StaticContent/ACT/Algorithms/Visio-TSH.pdf">www.acmg.net/StaticContent/ACT/Algorithms/Visio-TSH.pdf</a> Low T4/Elevated TSH: <a href="http://www.acmg.net/StaticContent/ACT/Algorithms/Visio-CH-T4.pdf">www.acmg.net/StaticContent/ACT/Algorithms/Visio-CH-T4.pdf</a>
<i>Recommended Uniform Screening Panel (RUSP)</i>	Core Panel

\*\* Please be aware that secondary hypothyroidism due to hypopituitarism will present with low T4 and low TSH.

**Sickle Cell Disease including Hemoglobin SS (SS), Hemoglobin S/Beta<sup>+</sup> Thalassemia (HbSB<sup>+</sup>), Hemoglobin S/Beta<sup>0</sup> Thalassemia (HbSB<sup>0</sup>), and Sickle C Disease (HbSC) (Hemoglobinopathy)**

<i>Disease (common abbreviation)</i>	Sickle Cell Disease including Hemoglobin SS (SS), Hemoglobin S/Beta <sup>+</sup> Thalassemia (HbSB <sup>+</sup> ), Hemoglobin S/Beta <sup>0</sup> Thalassemia (HbSB <sup>0</sup> ) and Sickle C Disease (HbSC)
<i>MIM #</i>	603903 (SS); 141900 (Others)
<i>SNOMED Code / ICD-10-CM Code</i>	Multiple / Multiple
<i>Enzyme or other abnormality</i>	Beta globin
<i>MIM # / Enzyme Commission #</i>	MIM # 141900 / N/A
<i>Abnormal Newborn Screening Metabolite(s)</i>	FS, FSA, FSC, etc.
<i>LOINC Number(s)</i>	N/A
<i>Initial Diagnostics at Referral Center</i>	Hemoglobin electrophoresis or high performance liquid chromatography (HPLC)
<i>Recommended additional testing to consider at time of initial consultation</i>	CBC
<i>Abnormal Metabolites Expected</i>	FS, FSA, FSC, etc. CBC abnormalities may be expected depending on the disorder; newborn CBC normal in SS
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Hemoglobin electrophoresis or HPLC
<i>Differential Diagnosis</i>	
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	SS: <a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0002895%5BDISCU%5D&amp;condition=C0002895&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0002895%5BDISCU%5D&amp;condition=C0002895&amp;compare_labs=1</a> HbSB <sup>0</sup> , HbSB <sup>+</sup> : <a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0221019%5BDISCU%5D&amp;condition=C0221019&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0221019%5BDISCU%5D&amp;condition=C0221019&amp;compare_labs=1</a> HbSC: <a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0019034%5BDISCU%5D&amp;condition=C0019034&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0019034%5BDISCU%5D&amp;condition=C0019034&amp;compare_labs=1</a>

<i>Recommended Uniform Screening Panel (RUSP)</i>	Core Panel

## Other Hemoglobinopathies (Hemoglobinopathy)

<i>Disease (common abbreviation)</i>	Other Hemoglobinopathies
<i>MIM #</i>	141900
<i>SNOMED Code / ICD-10-CM Code</i>	Multiple / Multiple
<i>Enzyme or other abnormality</i>	Beta globin
<i>MIM # / Enzyme Commission #</i>	141900 / N/A
<i>Abnormal Newborn Screening Metabolite(s)</i>	FVar, etc.
<i>LOINC Number</i>	N/A
<i>Initial Diagnostics at Referral Center</i>	Hemoglobin electrophoresis or high performance liquid chromatography (HPLC)
<i>Recommended additional testing to consider at time of initial consultation</i>	CBC
<i>Abnormal Metabolites Expected</i>	FVar, etc. CBC abnormalities may be expected
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Hemoglobin electrophoresis or HPLC
<i>Differential Diagnosis</i>	
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	Multiple labs; see Sickle Cell Disease
<i>GeneReviews</i>	See Sickle Cell Disease
<i>American College of Medical Genetics ACT Sheet</i>	See Sickle Cell Disease
<i>American College of Medical Genetics Algorithm</i>	All Hemoglobinopathies: <a href="http://www.acmg.net/StaticContent/ACT/Algorithms/Visio-Hemoglobinopathy_4.18.06.pdf">www.acmg.net/StaticContent/ACT/Algorithms/Visio-Hemoglobinopathy_4.18.06.pdf</a>
<i>Recommended Uniform Screening Panel (RUSP)</i>	Core Panel

**Sickle Cell Carrier (HbAS)  
(Hemoglobinopathy)**

<i>Disease (common abbreviation)</i>	Sickle Cell Carrier (HbAS)
<i>MIM #</i>	141900
<i>SNOMED Code / ICD-10-CM Code</i>	Multiple / Multiple
<i>Enzyme or other abnormality</i>	Beta globin
<i>MIM # / Enzyme Commission #</i>	141900 / N/A
<i>Abnormal Newborn Screening Metabolite(s)</i>	FAS
<i>LOINC Number(s)</i>	N/A
<i>Initial Diagnostics at Referral Center</i>	Hemoglobin electrophoresis or high performance liquid chromatography (HPLC)
<i>Recommended additional testing to consider at time of initial consultation</i>	CBC
<i>Abnormal Metabolites Expected</i>	FAS Newborn CBC normal
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Hemoglobin electrophoresis or HPLC
<i>Differential Diagnosis</i>	
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	See Sickle Cell Disease
<i>GeneReviews</i>	See Sickle Cell Disease
<i>American College of Medical Genetics ACT Sheet</i>	<a href="http://www.acmg.net/StaticContent/ACT/ACT_sheet_Hb_carrier_trait_FAS.pdf">www.acmg.net/StaticContent/ACT/ACT_sheet_Hb_carrier_trait_FAS.pdf</a>
<i>American College of Medical Genetics Algorithm</i>	All Hemoglobinopathies: <a href="http://www.acmg.net/StaticContent/ACT/Algorithms/Visio-Hemoglobinopathy_4.18.06.pdf">www.acmg.net/StaticContent/ACT/Algorithms/Visio-Hemoglobinopathy_4.18.06.pdf</a>
<i>Recommended Uniform Screening Panel (RUSP)</i>	Core Panel

**Argininemia (ARG)  
(Amino Acidemias)**

<i>Disease (common abbreviation)</i>	Argininemia (ARG)
<i>MIM #</i>	207800
<i>SNOMED Code / ICD-10-CM Code</i>	23501004 / E72.21
<i>Enzyme or other abnormality</i>	Arginase
<i>MIM # / Enzyme Commission #</i>	608313 / 3.5.3.1
<i>Abnormal Newborn Screening Metabolite(s)</i>	Elevated arginine
<i>LOINC Number</i>	47562-4
<i>Initial Diagnostics at Referral Center</i>	Plasma amino acids (PAA)
<i>Recommended additional testing to consider at time of initial consultation</i>	Liver function tests Ammonia Urine orotic acid
<i>Abnormal Metabolites Expected</i>	Elevated arginine (PAA) Normal liver function tests expected Normal/slightly elevated ammonia Normal/elevated orotic acid
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Elevated arginine RBC arginase assay if available
<i>Differential Diagnosis</i>	None
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0268548%5BDI%5D&amp;condition=C0268548&amp;compare_labs=1">http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0268548%5BDI%5D&amp;condition=C0268548&amp;compare_labs=1</a>
<i>GeneReviews</i>	<a href="http://www.ncbi.nlm.nih.gov/books/NBK1159/">www.ncbi.nlm.nih.gov/books/NBK1159/</a>
<i>American College of Medical Genetics ACT Sheet</i>	<a href="http://www.acmg.net/StaticContent/ACT/Arginine.pdf">www.acmg.net/StaticContent/ACT/Arginine.pdf</a>
<i>American College of Medical Genetics Algorithm</i>	<a href="http://www.acmg.net/StaticContent/ACT/Algorithms/Visio-Arginine.pdf">www.acmg.net/StaticContent/ACT/Algorithms/Visio-Arginine.pdf</a>
<i>Recommended Uniform Screening Panel (RUSP)</i>	Secondary Target

**Argininosuccinic Lyase Deficiency;  
Argininosuccinic Aciduria (ASA)  
(Amino Acidemia)**

<i>Disease (common abbreviation)</i>	Argininosuccinic Lyase Deficiency; Argininosuccinic Aciduria (ASA)
<i>MIM #</i>	207900
<i>SNOMED Code / ICD-10-CM Code</i>	41013004 / E72.22
<i>Enzyme or other abnormality</i>	Argininosuccinic lyase
<i>MIM # / Enzyme Commission #</i>	608310 / 4.3.2.1
<i>Abnormal Newborn Screening Metabolite(s)</i>	Elevated citrulline (some states elevated ASA)
<i>LOINC Number(s)</i>	42892-0
<i>Initial Diagnostics at Referral Center</i>	Plasma amino acids (PAA) Urine orotic acid
<i>Recommended additional testing to consider at time of initial consultation</i>	Liver function tests Ammonia
<i>Abnormal Metabolites Expected</i>	Elevated citrulline, glutamine, and argininosuccinic acid (PAA) Decreased arginine (PAA) Elevated urine orotic acid possible Normal liver function tests expected Elevated ammonia expected
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Elevated argininosuccinic acid
<i>Differential Diagnosis</i>	Citrullinemia Type I (CIT I); Citrullinemia Type II (CIT II)/Citrin Deficiency
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0268547%5BDISCU%5D&amp;condition=C0268547&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0268547%5BDISCU%5D&amp;condition=C0268547&amp;compare_labs=1</a>

<i>Recommended Uniform Screening Panel (RUSP)</i>	Core Panel

**Citrullinemia Type I (CIT-I)  
(Amino Acidemia)**

<i>Disease (common abbreviation)</i> <i>MIM #</i> <i>SNOMED Code / ICD-10-CM Code</i> <i>Enzyme or other abnormality</i> <i>MIM # / Enzyme Commission #</i>	Citrullinemia Type I (CIT-I) 215700 398680004 / E72.23 Argininosuccinate synthetase 603470 / 6.3.4.5
<i>Abnormal Newborn Screening Metabolite(s)</i> <i>LOINC Number</i>	Elevated citrulline 42892-0
<i>Initial Diagnostics at Referral Center</i>	Plasma amino acids (PAA) Urine orotic acid
<i>Recommended additional testing to consider at time of initial consultation</i>	Liver function tests Ammonia
<i>Abnormal Metabolites Expected</i>	Elevated citrulline (and alanine and glutamine if sick) (PAA) Decreased arginine (PAA) Elevated urine orotic acid Normal liver function tests expected Elevated ammonia expected
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Elevated citrulline, (and alanine and glutamine if sick) and orotic acid levels Enzyme analysis in fibroblasts Mutation analysis is required to differentiate between mild CIT Type I and Citrin Deficiency
<i>Differential Diagnosis</i>	Argininosuccinic Lyase Deficiency/ Argininosuccinic Aciduria (ASA); Citrullinemia Type II (CIT II)/Citrin Deficiency
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0175683%5BDISCU%5D&amp;condition=C0175683&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0175683%5BDISCU%5D&amp;condition=C0175683&amp;compare_labs=1</a>
<i>GeneReviews</i>	<a href="http://www.ncbi.nlm.nih.gov/books/NBK1458/">www.ncbi.nlm.nih.gov/books/NBK1458/</a>

<i>American College of Medical Genetics Algorithm</i>	<a href="http://www.acmg.net/StaticContent/ACT/Algorithms/Visio-Citrulline.pdf">www.acmg.net/StaticContent/ACT/Algorithms/Visio-Citrulline.pdf</a>
<i>Recommended Uniform Screening Panel (RUSP)</i>	Core Panel

**Citrullinemia Type II (CIT-II); Citrin Deficiency)  
(Amino Acidemia)**

<i>Disease (common abbreviation)</i> <i>MIM #</i> <i>SNOMED Code / ICD-10-CM Code</i> <i>Enzyme or other abnormality</i> <i>MIM # / Enzyme Commission #</i>	Citrullinemia Type II (CIT-II); Citrin Deficiency 603471, 605814 30529005 / E72.23 Mitochondrial aspartate-glutamate carrier (citrin) 603859 / None
<i>Abnormal Newborn Screening Metabolite(s)</i> <i>LOINC Number(s)</i>	Elevated citrulline 42892-0
<i>Initial Diagnostics at Referral Center</i>	Plasma amino acids (PAA) Urine orotic acid
<i>Recommended additional testing to consider at time of initial consultation</i>	Liver function tests Ammonia RBC Galactose-1-Phosphate
<i>Abnormal Metabolites Expected</i>	Elevated citrulline, arginine, methionine, threonine and lysine (PAA) Elevated urine orotic acid possible Liver function tests: elevated bilirubin Normal ammonia Elevated RBC galactose-1-phosphate
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Elevated citrulline with normal ammonia and glutamine levels Mutation analysis is required to differentiate between mild CIT Type I and Citrin Deficiency
<i>Differential Diagnosis</i>	Argininosuccinic Lyase Deficiency/ Argininosuccinic Aciduria (ASA); Citrullinemia Type I (CIT I)
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C1863844%5BDISCU%5D&amp;condition=C1863844&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C1863844%5BDISCU%5D&amp;condition=C1863844&amp;compare_labs=1</a>

<i>Recommended Uniform Screening Panel (RUSP)</i>	Secondary Target

Note: Several cases of citrin deficiency are detected on second screen, with a completely normal first screen

## Homocystinuria (HCY) (Amino Acidemia)

<i>Disease (common abbreviation)</i>	Homocystinuria (HCY)
<i>MIM #</i>	236200
<i>SNOMED Code / ICD-10-CM Code</i>	24308003 / E72.11
<i>Enzyme or other abnormality</i>	Cystathionine beta-synthase (CBS)
<i>MIM # / Enzyme Commission #</i>	236300 / 4.2.1.22
<i>Abnormal Newborn Screening Metabolite(s)</i>	Elevated methionine
<i>LOINC Number(s)</i>	47700-0
<i>Initial Diagnostics at Referral Center</i>	Plasma amino acids (PAA) Total plasma homocysteine Urine organic acids (UOA)
<i>Recommended additional testing to consider at time of initial consultation</i>	Liver function tests
<i>Abnormal Metabolites Expected</i>	Elevated methionine, free homocystine and total homocysteine (PAA) No succinylacetone (UOA) Normal liver function tests expected
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Elevated methionine, free homocystine and total homocysteine Evaluate for B6 responsiveness and/or do mutation analysis
<i>Differential Diagnosis</i>	Hypermethioninemia (HMET)/Tyrosinemia Type I (TYR I)/Liver Disease
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C3150344%5BDISCU%5D&amp;condition=C3150344&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C3150344%5BDISCU%5D&amp;condition=C3150344&amp;compare_labs=1</a>

<i>Recommended Uniform Screening Panel (RUSP)</i>	Core Panel

**Hypermethioninemia (MET); Methionine Adenosyltransferase Deficiency; S-Adenosylhomocysteine Hydrolase (SAH)  
(Amino Acidemia)**

<i>Disease (common abbreviation)</i>	Hypermethioninemia (MET); S-Adenosylhomocysteine Hydrolase (SAH); Methionine Adenosyltransferase Deficiency
<i>MIM #</i>	250850
<i>SNOMED Code / ICD-10-CM Code</i>	37695001 / E72.19
<i>Enzyme or other abnormality</i>	Methionine adenosyltransferase (MAT I/II)
<i>MIM # / Enzyme Commission #</i>	601468 / 2.5.1.6
<i>Abnormal Newborn Screening Metabolite(s)</i>	Elevated methionine
<i>LOINC Number(s)</i>	47700-0
<i>Initial Diagnostics at Referral Center</i>	Plasma amino acids Total plasma homocysteine Urine organic acids
<i>Recommended additional testing to consider at time of initial consultation</i>	Liver function tests
<i>Abnormal Metabolites Expected</i>	Elevated methionine Normal/elevated total homocysteine Normal organic acid analysis
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Persistently elevated methionine Measurement of S-adenosylhomocysteine, S-adenosylmethionine and sarcosine in plasma
<i>Differential Diagnosis</i>	Homocystinuria (HCY); Liver Disease
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0268621%5BDISCU%5D&amp;condition=C0268621&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0268621%5BDISCU%5D&amp;condition=C0268621&amp;compare_labs=1</a>

<i>Recommended Uniform Screening Panel (RUSP)</i>	Secondary Target

**Maple Syrup Urine Disease (MSUD)  
(Amino Acidemia)**

<i>Disease (common abbreviation)</i>	Maple Syrup Urine Disease (MSUD)
<i>MIM #</i>	248600
<i>SNOMED Code / ICD-10-CM Code</i>	27718001 / E71.0
<i>Enzyme or other abnormality</i>	Branched-chain alpha-keto acid dehydrogenase (BCKD)
<i>MIM # / Enzyme Commission #</i>	608348 / 1.2.4.4
<i>Abnormal Newborn Screening Metabolite(s)</i>	Elevated leucine + isoleucine
<i>LOINC Number(s)</i>	53152-5
<i>Initial Diagnostics at Referral Center</i>	Plasma amino acids (PAA) Urine organic acids (UOA)
<i>Recommended additional testing to consider at time of initial consultation</i>	Urine ketones
<i>Abnormal Metabolites Expected</i>	Elevated leucine, isoleucine, valine and alloisoleucine (PAA) Abnormal branched-chain ketoacids (UOA) Elevated urinary ketones
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Elevated branched-chain amino acids and elevated alloisoleucine Consider BCKD assay in cultured fibroblasts in mild cases with intermittent or mild elevations of branched chain amino acids.
<i>Differential Diagnosis</i>	None
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0024776%5BDISCU%5D&amp;condition=C0024776&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0024776%5BDISCU%5D&amp;condition=C0024776&amp;compare_labs=1</a>

<i>Recommended Uniform Screening Panel (RUSP)</i>	Core Panel

**Phenylketonuria (PKU) and Hyperphenylalaninemia (H-PHE)  
(Amino Acidemia)**

<i>Disease (common abbreviation)</i>	Phenylketonuria (PKU) and Hyperphenylalaninemia (H-PHE)
<i>MIM #</i>	261600
<i>SNOMED Code / ICD-10-CM Code</i>	7573000 / E70.0
<i>Enzyme or other abnormality</i>	Phenylalanine hydroxylase
<i>MIM # / Enzyme Commission #</i>	261600 / 1.14.16.1
<i>Abnormal Newborn Screening Metabolite(s)</i>	Elevated phenylalanine
<i>LOINC Number(s)</i>	29573-3
<i>Initial Diagnostics at Referral Center</i>	Plasma amino acids (PAA)
<i>Recommended additional testing to consider at time of initial consultation</i>	Urine biopterin and neopterin Dihydropteridine reductase activity
<i>Abnormal Metabolites Expected</i>	Elevated phenylalanine levels Normal/low tyrosine (PAA) Normal pterin studies
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Elevated phenylalanine levels
<i>Differential Diagnosis</i>	Defects of Biopterin Metabolism, Neonates on Total Parenteral Nutrition (TPN)
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0031485%5BDISCU%5D&amp;condition=C0031485&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0031485%5BDISCU%5D&amp;condition=C0031485&amp;compare_labs=1</a>

## Long-chain L3-Hydroxyacyl-CoA Dehydrogenase Deficiency (LCHAD) (Fatty Acid Oxidation Disorder)

<i>Disease (common abbreviation)</i>	Long-chain 3-Hydroxyacyl-CoA Dehydrogenase Deficiency (LCHAD)
<i>MIM #</i>	609016
<i>SNOMED Code / ICD-10-CM Code</i>	237999008 / E71.310
<i>Enzyme or other abnormality</i>	Long-chain L3-Hydroxyacyl-CoA dehydrogenase
<i>MIM # / Enzyme Commission #</i>	600890 / 1.1.1.211
<i>Abnormal Newborn Screening Metabolite(s)</i>	Elevated C16OH
<i>LOINC Number(s)</i>	50125-4 Elevated C18:1OH 50113-0
<i>Initial Diagnostics at Referral Center</i>	Acylcarnitine profile Urine organic acids Mutation analysis, as negative metabolites do not rule out the disorder
<i>Recommended additional testing to consider at time of initial consultation</i>	Liver function tests Blood glucose Creatinine phosphokinase (CPK) Plasma Carnitine, total and free
<i>Abnormal Metabolites Expected</i>	Elevated C16OH, C18:1OH (acylcarnitines) Elevated 3-OH-dicarboxylic acids (C6-C14), saturated and unsaturated, (UOA) which are only be seen during episodes of metabolic decompensation, with normal or absent ketones Detection of known pathological mutation in trans Liver function tests may be abnormal in sick patients Blood glucose depends on fed status of patient CPK may be elevated in sick patients Normal/low plasma carnitine levels
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Mutation analysis for combined LCHAD/TFP: 0 mutation - ruled out (unless consanguineous and as long as metabolites normal) 1 pathological mutation - proceed to enzyme assay or functional probe 2 pathological mutations in trans - diagnosis confirmed
<i>Differential Diagnosis</i>	Trifunctional Protein Deficiency (TFP)
<i>Specific Testing Laboratories as listed in Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0342786[DISCU I]&amp;condition=CN074230&amp;compare_labs=1">http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0342786[DISCU I]&amp;condition=CN074230&amp;compare_labs=1</a>

**T-cell-related Lymphocyte Deficiencies: Severe Combined Immunodeficiency (SCID);  
(Other Genetic Condition)**

<i>Disease (common abbreviation)</i>	T-cell-related Lymphocyte Deficiencies: Severe Combined Immunodeficiency (SCID)
<i>MIM #</i>	Many
<i>SNOMED Code / ICD-10-CM Code</i>	31323000/D81.1
<i>Enzyme or other abnormality</i>	
<i>MIM # / Enzyme Commission #</i>	
<i>Abnormal Newborn Screening Metabolite(s)</i>	
<i>LOINC Number(s)</i>	T-Cell Receptor Excision Circles (TREC)
<i>Initial Diagnostics at Referral Center</i>	Flow cytometry measuring the absolute number of T-cells, B-cells and NK cells
<i>Recommended additional testing to consider at time of initial consultation</i>	Repeat Newborn Screen (especially in premature infants), Lymphocyte proliferation to mitogens, T-cell subsets (naïve, memory and activated)
<i>Abnormal Metabolites Expected</i>	Low T cell number, variable B and NK cells numbers depending on SCID etiology
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Varies by SCID subtype, needs referral to Specialty Center
<i>Differential Diagnosis</i>	Many SCID subtypes and other immunodeficiencies are associated with T-cells lymphopenia. Chromosome 22q11 deletion syndrome (DiGeorge syndrome) is a common differential diagnosis. Premature infants without a hereditary immunodeficiency are also more likely to have low TREC values.

<i>Abnormal Newborn Screening Metabolite(s)</i>	Decreased GAA activity
<i>LOINC Number(s)</i>	63414-7
<i>Initial Diagnostics at Referral Center</i>	Leukocyte GAA activity Mutation analysis of GAA Determine cross-reactive immunologic material (CRIM) status Cardiac evaluation (echocardiogram (EKG))
<i>Recommended additional testing to consider at time of initial consultation</i>	Serum creatine kinase (CK) Urine glucose tetrasaccharide (Glc4) Alanine aminotransferase (ALT)
<i>Abnormal Metabolites Expected</i>	Deficient GAA activity Elevated CK Elevated Glc4 Elevated ALT
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Deficient GAA activity Known pathological mutations in trans
<i>Differential Diagnosis</i>	None
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0017921%5BDISCU%5D&amp;condition=C0017921&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0017921%5BDISCU%5D&amp;condition=C0017921&amp;compare_labs=1</a>

**Krabbe Disease (Galactosylceramide Beta-Galactosidase Deficiency)  
(Other Genetic Condition)**

<i>Disease (common abbreviation)</i> <i>MIM #</i> <i>SNOMED Code / ICD-10-CM Code</i> <i>Enzyme or other abnormality</i> <i>MIM # / Enzyme Commission #</i>	Krabbe Disease; Galactosylceramide Beta-Galactosidase deficiency 245200 Not listed Galactosylceraminidase (GALC) 606890 / Not listed
<i>Abnormal Newborn Screening Metabolite(s)</i> <i>LOINC Number(s)</i>	Decreased GALC activity Mutation analysis in cases with low activity
<i>Initial Diagnostics at Referral Center</i>	Enzyme assay to Jefferson Lab Parents' and baby's blood spots to state for zygosity and mutation analysis Additional blood spot collected for HLA typing if needed
<i>Recommended additional testing to consider at time of initial consultation</i>	Not generally
<i>Abnormal Metabolites Expected</i>	Decreased enzyme activity Consistent mutation results
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes (based on current experience)
<i>Diagnostic Confirmation</i>	Decreased enzyme activity Mutation analysis
<i>Differential Diagnosis</i>	None
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0023521%5BDISCU%5D&amp;condition=C0023521&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0023521%5BDISCU%5D&amp;condition=C0023521&amp;compare_labs=1</a>

**Hurler Syndrome (Mucopolysaccharidosis, Type I), MPS I  
(Lysosomal Storage Disorder)**

<i>Disease (common abbreviation)</i>	Hurler Syndrome; Mucopolysaccharidosis, Type I (MPS I)
<i>MIM #</i>	607014
<i>SNOMED Code / ICD-10-CM Code</i>	7561003 / E76.01
<i>Enzyme or other abnormality</i>	$\alpha$ -L-iduronidase (IDUA)
<i>MIM # / Enzyme Commission #</i>	252800/3.2.1.76
<i>Abnormal Newborn Screening Metabolite(s)</i>	Deficient IDUA
<i>LOINC Number(s)</i>	55909-6
<i>Initial Diagnostics at Referral Center</i>	Repeat IDUA Urine glucosaminoglycans (GAG)
<i>Recommended additional testing to consider at time of initial consultation</i>	Mutation analysis of IDUA
<i>Abnormal Metabolites Expected</i>	Increased heparin and dermatan sulfate (a GAG)
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Deficient IDUA
<i>Differential Diagnosis</i>	None
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0023786%5BDISCU%5D&amp;condition=C0023786&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0023786%5BDISCU%5D&amp;condition=C0023786&amp;compare_labs=1</a>

<i>American College of Medical Genetics Algorithm</i>	No algorithm
<i>Recommended Uniform Screening Panel (RUSP)</i>	Not on panel

**Hunter Syndrome (Mucopolysaccharidosis, Type II), MPS II  
(Lysosomal Storage Disorder)**

<i>Disease (common abbreviation)</i>	Hunter Syndrome; Mucopolysaccharidosis, Type II (MPS II)
<i>MIM #</i>	309900
<i>SNOMED Code / ICD-10-CM Code</i>	70737009 / E76.1
<i>Enzyme or other abnormality</i>	Iduronate sulfatase (IDS)
<i>MIM # / Enzyme Commission #</i>	300823 / 3.1.6.13
<i>Abnormal Newborn Screening Metabolite(s)</i>	Deficient iduronate sulfatase activity
<i>LOINC Number(s)</i>	24087-9 (Enzymatic activity, serum)
<i>Initial Diagnostics at Referral Center</i>	Repeat iduronate sulfatase activity Urine GAG
<i>Recommended additional testing to consider at time of initial consultation</i>	Mutation analysis of IDS
<i>Abnormal Metabolites Expected</i>	Deficient iduronate sulfatase activity Increased dermatan and heparan sulfate (GAG)
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Deficient iduronate sulfatase activity
<i>Differential Diagnosis</i>	None
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0026705%5BDISCU%5D&amp;condition=C0026705&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0026705%5BDISCU%5D&amp;condition=C0026705&amp;compare_labs=1</a>

<i>American College of Medical Genetics ACT Sheet</i>	No ACT sheet
<i>American College of Medical Genetics Algorithm</i>	No algorithm
<i>Recommended Uniform Screening Panel (RUSP)</i>	Not on Panel

**Maroteaux-Lamy Syndrome (Mucopolysaccharidosis type VI), MPS VI  
(Lysosomal Storage Disorder)**

<i>Disease (common abbreviation)</i> <i>MIM #</i> <i>SNOMED Code / ICD-10-CM Code</i> <i>Enzyme or other abnormality</i> <i>MIM # / Enzyme Commission #</i>	Maroteaux-Lamy Syndrome; Mucopolysaccharidosis Type VI (MPS VI) 253200 69463008 / E76.29 Arylsulfatase B (ARSB) 611542 / 3.1.6.12
<i>Abnormal Newborn Screening Metabolite(s)</i> <i>LOINC Number(s)</i>	Deficient ARSB activity 2646-8 (Enzymatic activity, serum)
<i>Initial Diagnostics at Referral Center</i>	Repeat arylsulfatase B activity Urine GAG
<i>Recommended additional testing to consider at time of initial consultation</i>	Mutation analysis of ARSB
<i>Abnormal Metabolites Expected</i>	Deficient ARSB activity Increased dermatan sulfate (GAG)
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes
<i>Diagnostic Confirmation</i>	Deficient ARSB activity
<i>Differential Diagnosis</i>	None
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=C0026709%5BDISCU%5D&amp;condition=C0026709&amp;compare_labs=1">www.ncbi.nlm.nih.gov/gtr/tests/?term=C0026709%5BDISCU%5D&amp;condition=C0026709&amp;compare_labs=1</a>
<i>GeneReviews</i>	None
<i>American College of Medical Genetics ACT Sheet</i>	No ACT sheet
<i>American College of Medical Genetics Algorithm</i>	No algorithm
<i>Recommended Uniform Screening Panel (RUSP)</i>	Not on Panel

**X-Linked Adrenoleukodystrophy, X-ALD  
(Peroxisomal Disorder)**

<i>Disease (common abbreviation)</i>	X-Linked Adrenoleukodystrophy (XALD)
<i>Phenotype MIM #</i>	300100
<i>SNOMED Code / ICD-10-CM Code</i>	1232670018 /
<i>Enzyme or other abnormality</i>	ATP-Binding Cassette
<i>Gene MIM # / Enzyme Commission #</i>	300371 /
<i>Abnormal Newborn Screening Metabolite(s)</i>	Very Long Chain Fatty Acid C26:0
<i>LOINC Number(s)</i>	ABCD1 mutation
<i>Initial Diagnostics at Referral Center</i>	Very Long-Chain Fatty Acid (Peroxisomal) Analysis Confirmatory mutation analysis
<i>Recommended additional testing to consider at time of initial consultation</i>	Plasmalogen analysis in patients with no identified mutation on newborn screening
<i>Abnormal Metabolites Expected</i>	Elevated C26:0, Elevated ratios C24:0/C22:0, C26:0/C22:0 Pathological mutation in ABCD1 gene
<i>If initial testing is negative has the disorder been ruled out?</i>	Yes, but need to consider other peroxisomal disorders
<i>Diagnostic Confirmation</i>	Abnormal Mutation analysis of ABCD1 gene
<i>Differential Diagnosis</i>	Other Peroxisomal Disorders
<i>Specific Testing Laboratories as listed in the Genetic Testing Registry</i>	<a href="http://www.ncbi.nlm.nih.gov/gtr/tests/?term=ABCD1&amp;condition=C0162309&amp;compare_labs=1">http://www.ncbi.nlm.nih.gov/gtr/tests/?term=ABCD1&amp;condition=C0162309&amp;compare_labs=1</a>

<i>American College of Medical Genetics ACT Sheet</i>	No ACT sheet
<i>American College of Medical Genetics Algorithm</i>	No algorithm
<i>Recommended Uniform Screening Panel (RUSP)</i>	No

## Abbreviations

17-OHP	17-Hydroxyprogesterone
2,4Di	2,4-Dienoyl-CoA reductase deficiency
2M3HBA	2-Methyl-3-hydroxybutyryl-CoA dehydrogenase deficiency
2MBG	2-Methylbutyryl glycinuria
3MCC	3-Methylcrotonyl-CoA carboxylase
3MGA	3-Methylglutaconic aciduria
A-Gal A	Alpha-galactosidase A
ACT sheets	Action sheets
ACTH	Adrenocorticotrophic hormone
ADA	Adenosine deaminase
$\alpha$ -GalA	Alpha-galactosidase A
AFP	Alpha fetoprotein
AG	Acylglycine
ALT	Alanine aminotransferase
ARG	Argininemia
ARSB	Arylsulfatase B
ASA	Argininosuccinic aciduria
ASM	Acid sphingomyelinase
B <sub>12</sub>	Vitamin B <sub>12</sub> , cobalamin
BAER	Brainstem auditory evoked response
BCKD	Branched-chain alpha-keto acid dehydrogenase
BIOT	Biotinidase deficiency, Biotinidase
$\beta$ KT	Beta-ketothiolase deficiency
C0	Free carnitine
C10	Decanoyl carnitine
C10:1	Decenoyl carnitine
C10:2	Decadienoyl carnitine
C14	Tetradecanoyl carnitine
C14:1	Tetradecenoyl carnitine
C16	Hexadecanoyl carnitine
C16OH	Hydroxyhexadecanoyl carnitine
C18	Octadecanoyl carnitine
C18:1	Octadecenoyl carnitine
C18:1OH	Hydroxyoctadecenoyl carnitine
C2	Acetyl-L-carnitine
C22:0	Docosanoic acid
C24:0	Tetracosanoic acid
C26:0	Hexacosanoic acid
C3	Propionyl carnitine
C3DC	Malonyl carnitine
C4	Butyryl carnitine + isobutyryl carnitine
C4DC	Methylmalonyl carnitine
C4OH	Hydroxybutyryl carnitine
C5	Isovaleryl carnitine
C5:1	Tiglyl carnitine
C5DC	Glutaryl carnitine

C5OH	Hydroxyisovaleryl carnitine
C6	Hexanoyl carnitine
C6DC	Methylglutaryl carnitine
C8	Octanoyl carnitine
CACT	Carnitine-acyl carnitine translocase
CAH	Congenital adrenal hyperplasia
CBC	Complete blood count
Cbl A,B	Cobalamin A,B cofactor
Cbl C	Cobalamin C cofactor
Cbl D <sub>1</sub>	Cobalamin D <sub>1</sub> cofactor
Cbl D <sub>2</sub>	Cobalamin D <sub>2</sub> cofactor
Cbl F	Cobalamin F cofactor
Cbl J	Cobalamin J cofactor
CBS	Cystathionine beta-synthase
CF	Cystic fibrosis
CFTR	Cystic fibrosis transmembrane receptor
CH	Congenital hypothyroidism
CIT I	Citrullinemia type I
CIT II	Citrullinemia type II
CK	Creatine kinase
CPK	Creatine phosphokinase
CPT I	Carnitine palmitoyl transferase type I deficiency
CPT II	Carnitine palmitoyl transferase type II deficiency
CRIM	Cross-reactive immunologic material
CSF	Cerebrospinal fluid
CUD	Carnitine uptake defect
EKG	Electrocardiogram
EMA	Ethylmalonic encephalopathy
FAH	Fumarylacetoacetase hydrolase
FS	Fetal and sickle cell hemoglobins
FSA	Fetal, sickle and adult hemoglobins
FSC	Fetal, sickle cell and C hemoglobins
GA 1	Glutaric acidemia type 1
GA 2	Glutaric acidemia type 2
GAA	Acid alpha-glucosidase
GAG	Glucosaminoglycans
Gal-1-P	Galactose-1-phosphate
GALC	Galactosylceramidase
GALE	Galactose epimerase deficiency
GALK	Galactokinase
GALT	Galactose-1-phosphate uridylyltransferase
GD	Gaucher disease
Glc4	Glucose tetrasaccharide
GLY	Glycine
GSD II	Glycogen storage disease, type II
HADH	Hydroxyacyl-CoA dehydrogenase
HbAS	Sickle cell carrier (adult and sickle cell hemoglobins)
HbS	Sickle cell hemoglobin
HbS <sup>0</sup>	Sickle cell beta zero thalassemia
HbS <sup>+</sup>	Sickle cell beta plus thalassemia

HbSC	Sickle/hemoglobin C disease
HCS	Holocarboxylase synthetase
HCY	Homocystinuria
HLA	Human leukocyte antigen
HMET	Hypermethioninemia
HMG	3-Hydroxy-3-methylglutaryl-CoA lyase deficiency
H-PHE	Hyperphenylalaninemia
HPLC	High-performance liquid chromatography
IBCD	Isobutyryl-CoA dehydrogenase deficiency
IBG	Isobutyrylglycinuria
ICD-10-CM	International Classification of Diseases, 10 <sup>th</sup> Revision, Clinical Modification
IDS	Iduronate sulfatase
IDUA	Alpha-L-iduronidase
IEM	Inborn error of metabolism
ILE	Isoleucine
IRT	Immunoreactive trypsinogen
IVA	Isovaleric acidemia
K	Potassium
LCHAD	Long-chain 3-hydroxyacyl-CoA dehydrogenase deficiency
LOINC	Logical Observation Identifiers Names and Codes
MA	Malonic aciduria
MADD	Multiple acyl-CoA dehydrogenase deficiency
MAT	Methionine adenosyltransferase
MCAD	Medium-chain acyl-CoA dehydrogenase deficiency
MCD	Multiple carboxylase deficiency
MCKAT	Medium-chain ketoacyl-CoA thiolase deficiency
MET	Methionine
MHBD	2-Methyl-3-hydroxybutyryl-CoA dehydrogenase deficiency
MIM	Mendelian Inheritance in Man
MLYCD	Malonyl-CoA decarboxylase
MMA	Methylmalonic acid
MPS I	Mucopolysaccharidosis, type I, Hurler syndrome
MPS II	Mucopolysaccharidosis, type II, Hunter syndrome
MPS IV	Mucopolysaccharidosis, type IV, Maroteaux-Lamy syndrome
MRI	Magnetic resonance imaging
M/SHAD	Medium/short-chain L-3-hydroxyacyl-CoA dehydrogenase deficiency
MSUD	Maple syrup urine disease
MUT	Methylmalonic-CoA mutase deficiency
NA	Sodium
N/A	Not available
NK	Natural killer cells
OCTN2	Organic cation/carnitine transporter
OH	Hydroxy
PA	Propionic acidemia
PAA	Plasma amino acids
PHE	Phenylalanine
PKU	Phenylketonuria
RBC	Red blood cell
RUSP	Recommended Universal Screening Panel
SA	Succinylacetone

SAA	Succinylacetoacetate
SAH	S-adenosyl homocysteine hydrolase
SCAD	Short-chain acyl-CoA dehydrogenase deficiency
SCHAD	Short-chain L-3-hydroxyacyl-CoA dehydrogenase deficiency
SCID	Severe combined immunodeficiency
SNOMED	Systematized Nomenclature of Medicine
SS	Sickle cell anemia
SUCLA <sub>1</sub>	Succinate-CoA lyase, alpha subunit
SUCLA <sub>2</sub>	Succinate-CoA lyase, beta subunit
SUM AC	Sum of all acylcarnitine levels
T3	Triiodothyronine
T4	Thyroxine
TFP	Trifunctional protein deficiency
TREC	T-cell receptor excision circle
TPN	Total parenteral nutrition
TSH	Thyroid stimulating hormone
TTN	Transient tyrosinemia of the newborn
TYR	Tyrosine
TYR I	Tyrosinemia type I
TYR II	Tyrosinemia type II
TYR III	Tyrosinemia type III
UAG	Urine acylglycine
UOA	Urine organic acids
VAL	Valine
VLCAD	Very long-chain acyl-CoA dehydrogenase deficiency
X-ALD	X-Linked Adrenoleukodystrophy
