Doc. No. 316 Date: 9/1/2021; page 1 of 1

| Sample name | Details |
|---|---|
| FIBERS (for phase contrast microscopy measurement) (non-NELAC) | Four 25 mm 0.8 micron MCE filters containing a variety of asbestos and non-asbestos fibers in various lengths |
| ASBESTOS (for transmission electron microscopy measurement) (non-NELAC) | For TEM. Two 25 mm 0.45 micron MCE filter samples generated from aerosol containing a variety of asbestos and non-asbestos fibers in various lengths. Occasionally a magnification or identification sample is substituted for one of the filter preps. |
